

# Juniata College

## Private College in Central PA

**Location(s):** Huntingdon, PA  
**Degrees:** Bachelor, Master  
**Phone:** (877) 586-4282  
**Website:** [juniata.edu](http://juniata.edu)  
**Email:** [info@juniata.edu](mailto:info@juniata.edu)

### **Fisheries and Aquatic Sciences, BS**

Studying Fisheries and Aquatic Sciences through the Department of Environmental Science and Studies provides a strong, hands-on learning experience that uses the natural environment to teach and supplement the concepts being taught. Upon completion of course work and graduation from the program students are certifiable as an Associate Fisheries Professional through the American Fisheries Society, the largest international professional society for fisheries conservation.

### **Sport Management, BS**

Juniata's sport management program is designed to equip students with the principal concepts and practices of the sport management industry. Through coursework spanning business, marketing, finance, sport marketing and sports law, students gain a comprehensive understanding of the unique challenges and opportunities in this growing field. As the demand for skilled professionals in sports management continues to rise, graduates with a solid understanding of business principles and a passion for sports are highly sought after to lead and shape the future of the sports industry.

### **Wildlife Conservation, BS**

Studying Wildlife Conservation through the Department of Environmental Science and Studies at Juniata College provides a strong, hands-on learning experience that uses the natural environment to help teach and supplement the concepts being taught. Students have the opportunity to get their hands dirty at our Raystown Field Station, become certified as an Associate Wildlife Biologist through the Wildlife Society, and present major research projects.

### **Environmental Studies, BS or 3+1 MBA**

An accelerated program provides the obvious benefit of receiving an MBA in the fourth year of study. At a time when many students are struggling to obtain a bachelors within 6 years at many institutions, students who complete this program at Juniata receive a bachelors from a highly ranked Liberal-arts school in just three years and an MBA in the fourth year. This results in many financial, and academic benefits.

## **Applied Ecology and Natural Resource Management, MS**

Juniata College's Master of Applied Ecology and Natural Resource Management is designed to equip students with the knowledge and skills needed to understand and address the complex environmental issues facing our planet. Students will prepare for future careers in environmental science and conservation.

This program also aims to foster critical thinking and problem-solving skills, and ethical and responsible environmental stewardship. Through hands-on research projects and real-world case studies, students will develop the ability to analyze and interpret data, design experiments, and communicate their findings effectively. Students will learn about the importance of approaching ecological challenges with creativity and innovation, and how best to use science to shape environmental policy and decision-making. Designed for in-person instruction, this program is intended for both part-time and full-time degree-seeking students.

### **Faculty**

**Uma Ramakrishnan - Environmental Sciences & Studies Department Chair**
