Equine Facilitated Therapeutics, BS

Fulfill your passion for horses and people through the equine facilitated therapeutics (EFT) program at Wilson College. This major equips students with the latest therapy techniques that use horses to promote physical and emotional growth in people with special needs. People with physical, cognitive and emotional challenges including ADHD, autism, depression and PTSD can benefit greatly from interaction with the horse as a therapy animal. By pursuing a career as an equine therapist, you will have the opportunity to help both children and adults build confidence and independence in with a unique, hands-on approach.

Esports Management, BA

Our esport program helps students develop and enhance technical and practical skills needed for strategizing games and managing teams and gaming events. Students will complete various courses in economics, business, and accounting.

We partnered with Unity, an industry-leading game development company, and the International Game Developers Association (IGDA) to create an esport program that encompasses the big picture of the gaming industry, from development and marketing to operations and distribution. You can also join the esports team in our dedicated arena and compete for the Phoenix.

Sport Management, BA

Our Bachelor of Arts degree in sport management prepares you for a career in in the fast-growing and in-demand sports industry. You will learn about accounting, business, economics, athletic coaching, sport management, exercise science, psychology, and sociology. You will gain the skills to lead and manage in exciting professional, semi-professional, and recreational sports.

Minor Fields of Study

Wilson College also offers undergraduate minors in **Athletic Coaching, Conservation Studies, Environmental Studies, Exercise Science, and Sport Management.**
